

## Rossllyn's New Logo

As part of our new look and new start, we have successfully released a new school logo. You can see it at the top of the letter. Our new logo has golden writing and we think it now looks more formal.

## Spectacular Science

Lots of children across the school have been doing work around exciting science projects this term. Year 4 were lucky enough to go on a Science Trip to Heathfield Primary and take part in lots of different science workshops. "The noise one was the best when we made straw kazoos," said one class, "but it was exciting making power from fruit too".

## Red Nose Day Disco

To raise money for Red Nose Day, we held a marvellous disco to raise money for Comic Relief. We interviewed some children to find out what they thought about it.

Janet said, "I think the disco was spectacular and I would like to do it again."

"I think the disco was amazing and I really enjoyed it," said Sophie. "All my friends were there too!"

Ryan said the best bit was that he could buy sweets and snacks and raise money for charity at the same time.

Year 5 have been lucky too! They became real scientists for the day at Nottingham University. They have been looking at Microbes and were able to use microscopes to see them up close. They even go to go inside a real lecture theatre. Year 5 are starting to think about University life early!

## The Tempest

For the last week of term, or even longer for some classes, we have been looking at Shakespeare's "The Tempest". This has included lots of drama and writing and even watching the play live from London.

During the showing, Bright Eze even got his idea read out on live internet television! He said that Prospero and Ferdinand should rule the island together and help each other.

Well done to all the children who sent in their ideas!
